

FM WORKSHOP

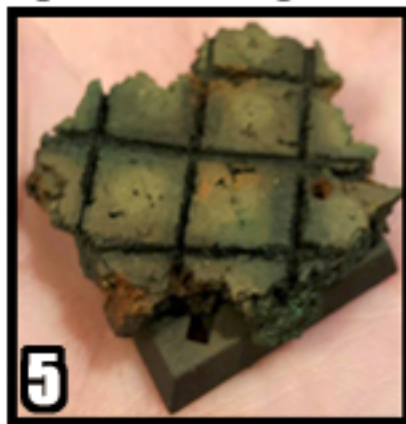

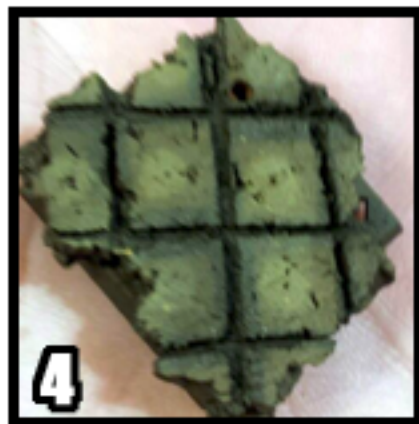

"HOW TO MAKE A DUNGEON BASE OUT OF CORK."

STEP 1) Tear cork to fit base and leave small open spaces on the base if you want to add foliage, now glue the cork down on your plastic base with a hot glue gun.

STEP 2) Grid off the cobblestones using a pen or pencil with a ruler.

STEP 3) Use a hobby saw to cut into the lines slightly for your grid pattern, we use a hand hacksaw. Just cut enough to add the grout lines do not cut all the way through it.

Clean dust out and primer black once dry drill hole for the mini.

STEP 4) Paint with base color, mid-tone color, hi-light, & white on the edges.

STEP 5) Add some green and orange pigment powders for contrast.

STEP 6) Glue the mini down & seal it prior to adding any foliage. Sealing it with foliage already on could cause

droplets to form all over the foliage, use a brush on sealer as an alternative.

STEP 7) Add your foliage and your base is finished.
